MYSORE LEGISLATIVE ASSEMBLY

TWENTY-SIXTH DAY

Saturday, 28th March 1964.

The House met in the Assembly Hall, Vidhana Soudha, Bangalore, at Thirty Minutes past Eight of the Clock.

Mr. SPEAKER (SRI B. VAIKUNTA BALIGA, B.A., B.L.) in the Chair.

CALLING ATTENTION TO A MATTER OF URGENT PUBLIC IMPORTANCE UNDER RULE 63.

re: **Cholera Epidemic in Kanakapura Taluk.**

SRI T. MADIAH GOWDA (Ramanagaram).—I beg to call the attention of the Minister for Health to the Cholera epidemic in Kanakapur Taluk, and its spread in neighbouring taluks and the deaths due to it.

DR. K. NAGAPPA ALVA (Minister for Health).—Sir, Cholera infection started in Bangalore South Taluk, Nittegere village on 7th March 1964. But the report was received 3 days later and immediate action was taken. The spread of this infection has been there but all the protective measures have been taken. Neighbouring villages have been infected also. Anticipatory inoculations also have been done in the non-affected but contiguous villages. Today, the situation is completely under control and hence after 24th, there has been no attack or death. Sir, in Bangalore South Taluk, 11 villages have been infected. In these villages over 7,000 anti-cholera inoculations have been done and in neighbouring 41 villages over 15,000 inoculations have been done. The patients also in these villages have been treated adequately. The number of attacks were 40 and deaths 19. In Bangalore North Taluk, there was only one case; Tyagarakondapura was infected and even here almost the entire population was protected by innoculations. In Kanakapura Taluk 19 villages and Kanakapura Town had been infected; the number of attacks here had been 83 and the number of deaths 24; by the 27th, 90 per cent of the population had been protected by inoculations and no fresh attacks were reported after 24th. I wish to mention Sir at this stage that majority of the attacks have been only of gastro-antiritis and every precaution has been taken and in a number of cases it was due to carelessness of the people that some deaths have taken place. In Ramanagaram, Bidadi Hobli, neighbouring South and Kanakapura Taluk, 6 villages have reported infections and indeed there had been 14 attacks and 2 deaths; in the neighbouring 8

villages also, inoculations had been done and there had been no fresh attacks since 21st March 1964. In Hoskote Taluk, one village Medihalli was infected and even here immediate action has been taken and inoculations and other care had been undertaken. From here the report is that there is no infection since 2 weeks. All preventive measures had been undertaken promptly. In Kanakapura Taluk itself 9 Medical Officers and 8 Senior Health Inspectors, 8 Junior Health Inspectors had been still doing their control measures. Chlorination of drinking water sources, disinfection of patients' belongings, sanitation treatment of patients are still being continued. Cholera situation is well under control, Sir. No new cases had been reported since 2 days and the total number of attacks so far is 154 and the total number of deaths 54 and the total inoculations done is 1,11,634.
